Abstract: Among the flowering plants, the family Asteraceae or Compositae is the largest family in the world, but in India, it occupies seventh place. Few members of this family provide edible oils, lettuce, chicory, artichokes, yacón, sweetening agents, coffee substitutes, and herbal teas and other beverages. Several species are grown as ornamental plants for their flowers, and some are important ornamental crops for the cut flower industry. Several species of this family possess medicinal properties. Out of about 696 plant species described under the family, only 207 species were found to be attacked by 199 aphid (Insecta : Homoptera : Aphididae) species in India. Among the aphid species, *Aphis gossypii* Glover was recorded feeding 77 food plants of Asteraceae followed by *Brachycaudus helichrysi* (Kalt.) (72 species), *Aphis spiraecola* Patch (70 species), *Myzus persicae* (Sulzer) (45 species), *Myzus ornatus* Laing (35 species), *Aphis fabae* Scopoli (25 species), and *Aphis craccivora* Koch (23 species). *Artemisia* and *Sonchus* were observed to be attacked by 60 and 25 aphid species, respectively.

Keywords: Asteraceae, Aphids, *Aphis gossypii*, *Artemisia*.

Introduction

Aphids are a group of about 4,700 species of small homopteran phytophagous insects that suck the phloem fluid of plants (Remaudiere and Remaudiere 1997). They are popularly known as plant-lice or ant-cows and vary in size between 0.7 to 7.0 mm in length. Many species of aphids infest important agricultural and horticultural crops and are therefore of major economic importance (Singh *et al.*, 2015). Aphids combine several traits: thelytokous parthenogenetic viviparity (obligate

parthenogenesis where mothers give birth only to daughter young ones), short generation time (about 10 days on average), telescoping of generations (where granddaughters begin developing directly within the daughters which are themselves not yet born), and polymorphism. Because of this they reach very large population sizes very quickly (Singh and Ghosh, 2002). These reproductive characteristics allow aphids to quickly colonize ephemeral resources and quickly growing plants and make them ideal enemies of monocultured crops. Many

species of aphids display complex life cycles with alternation of sexual and asexual generations and host plant alternation (Ghosh and Singh, 2000). Their plant-sap-sucking way of feeding is unique. Once they fasten their piercing mouthparts to a juicy plant, they tend to stay put (Dixon, 1998). They produce characteristic sticky honeydew which attracts wasps, butterflies, some moths and famously, some species of ants, which adore the sweet honeydew (Singh *et al.*, 2000). They like honeydew so much that they protect the aphid from predators. Some ants even herd collections of aphids like so many tiny cows. Many species of aphids transmit viruses to crop plants that have important implications on crop management strategies. Although aphids are the pest of crops, they are extremely important hosts for a number of parasitoids, predators, and an essential meal for numerous other insects, as well as birds.

The plant family Asteraceae or Compositae are herbs, shrubs, or less commonly trees and are arguably the largest family of flowering plants (Angiospermae), and commonly known as the aster, daisy, composite, or sunflower family. The family includes more than 23000 valid species under 1620 genera belonging to 12 subfamilies throughout the world and characterized by having the flowers reduced and organized into an involucrate pseudanthium in the form of a head or capitulum. The family is distributed widely from the Polar Regions to the tropics, colonizing all available habitats but most common in the arid and semiarid regions of subtropical and lower temperate. The Asteraceae comprise about 696 species in India (Singh *et al.*, 2002). This family has a remarkable ecological and economical importance.

Few members of the family Asteraceae provide us edible oils (e.g., *Helianthus annuus* (sunflower), *Carthamus tinctorius* (safflower), lettuce (*Lactuca sativa*), chicory

(*Cichorium* sp.), artichokes (*Cynara scolymus*, *Helianthus tuberosus*), yacón (*Smallanthus sonchifolius*), sweetening agents, coffee substitutes, and herbal teas and other beverages. Several species are grown as ornamental plants for their flowers, and some are important ornamental crops for the cut flower industry, e.g., marigold (*Tagetes* spp.), calendula (*Calendula* spp.), coneflowers (*Echinacea* spp.), daisies (*Argyranthemum* spp., *Gerbera* spp.), fleabane (*Eron* spp.), chrysanthemums (*Chrysanthemum* spp., *Dendranthema* spp.), dahlias (*Dahlia* spp.), zinnias (*Zinnia* spp.), and heleneums (*Helenium* spp.) (Dempewolf *et al.*, 2008). Several species of this family possess medicinal properties (Singh *et al.*, 2003). Asteraceae have also been used for industrial purposes. Marigold oil is used in the cola and cigarette industries. Several plants of this family produce plentiful nectar (honey plants). Certain genera, such as *Chrysanthemum*, *Pulicaria*, *Tagetes* and *Tanacetum* contain species with useful insecticidal properties (Ishman, 2006). *Parthenium argentatum* (guayule) is a source of hypoallergenic latex while its another species *Parthenium hysterophorus* (congress grass) is a major weed grown throughout the country (Oudhia *et al.*, 2000).

Earlier, the Indian aphids and their host plants were catalogued in 1983 (Raychaudhuri, 1983) and additions were made in 2001 (Chakrabarti and Sarkar, 2001) and later on by several authors but most of the names of aphid species as well as plant species mentioned therein are either invalid or misnomer. Following article deals with the updated checklist of aphids and its host plants belonging to the family Asteraceae based on the records in literatures and surveys upto June 2015. In the present compilation, attempts have been made to provide the valid scientific names of the species following updated taxonomic informations provided by <http://aphid.speciesfile.org> for

aphids and <http://www.ars-grin.gov> and <http://www.theplantlist.org> for plants. At several places, their synonyms were also mentioned. The subgeneric names of the aphids were excluded.

Following is the updated checklist of aphids infesting the plants belonging to the Asteraceae (or Compositae):

I: Plant-aphid list

1. ***Acanthospermum hispidum* DC.:** *Aphis gossypii* Glover (David, 1957; Behura, 1963).
2. ***Acmella paniculata* (Wall. ex DC.) Jansen (=*Spilanthes acmella* (L.) Murray):** *Aphis gossypii* Glover (Raychaudhuri, 1973), *Aphis spiraecola* Patch (Agarwala, 1979), *Brachycaudus helichrysi* (Kalt.) (Agarwala, 1979), *Myzus persicae* (Sulzer) (Agarwala, 1979).
3. ***Achillea millefolium* L.:** *Macrosiphoniella sudhakaris* Banerjee et al., (Banerjee et al., 1969; Chakrabarti, 1972), *Macrosiphoniella* sp. (Bhagat, 1984), *Uroleucon achilleae* (Koch) (Rishi, 1975).
4. ***Adenocaulon bicolor* Hook.:** *Nasonovia rostrata* David & Hameed (Chakrabarti and Raychaudhuri, 1978)
5. ***Adenostemma viscosum* J.R. Forst. & G. Forst.:** *Aphis fabae* complex (Raychaudhuri, 1973)
6. ***Ageratum conyzoides* L.:** *Aphis craccivora* Koch (Nayak et al., 1982; Ahmad and Kumar, 2006), *Aphis gossypii* Glover (Raychaudhuri, 1973; Nayak et al., 1982), *Aphis spiraecola* Patch (Raychaudhuri, 1973; Nayak et al., 1982), *Aphis* sp. (Behura, 1965), *Aulacorthum solani* (Kalt.) (Raychaudhuri, 1973), *Brachycaudus helichrysi* (Kalt.) (Behura, 1963), (Raychaudhuri, 1973, Agarwala, 1979), *Capitophorus hippophaes javanicus* Hille Ris Lambers (Raychaudhuri, 1973), *Myzus ornatus* Laing (Raychaudhuri, 1973), *Myzus persicae* (Sulzer) (Behura, 1963; Chakrabarti, 1972), *Neomasonaphis anaphalidis* (Basu) (Raychaudhuri, 1973).
7. ***Ageratum* sp.:** *Aphis gossypii* Glover (Raychaudhuri et al., 1980), *Brachycaudus helichrysi* (Kalt.) (Raychaudhuri et al., 1980), *Hyperomyzus carduellinus* (Theobald) (Raychaudhuri, 1973; Raychaudhuri, 1980), *Myzus persicae* (Sulzer) (Chakrabarti, 1972), *Vesiculaphis pieridis* Basu (Chakrabarti et al., 1974; Ghosh, 1986).
8. ***Ainsliaea aptera* DC.:** *Macrosiphoniella grandicauda* Takahashi & Moritsu (Chakrabarti and Sarkar, 2001).
9. ***Amberboa moschata* (L.) DC. (= *Centaurea moschata* L.):** *Aphis* sp. (Ghosh, 1970), *Myzus persicae* (Sulzer) (Behura, 1965), *Uroleucon compositae* (Theobald) (Verma et al., 1975).
10. ***Ambrosia artemisiaefolia* L.:** *Aphis spiraecola* Patch (Raychaudhuri, 1973; Rao, 1969).
11. ***Anaphalis araneosa* DC.:** *Brachycaudus helichrysi* (Kalt.) (Raychaudhuri, 1973).
12. ***Anaphalis busca* Prodr. (DC.):** *Oedisipham compositarum* van der Goot (Medda and Chakrabarti, 1998), *Dysaphis atina* Ghosh et al., (Chakrabarti and Sarkar 2001).
13. ***Anaphalis cinnonomea* C.B. Clarke:** *Brachycaudus helichrysi* (Kalt.) (Raychaudhuri et al., 1980), (Chakrabarti et al., 2002), *Brachycaudus* sp. (Chakrabarti et al., 2002), *Capitophorus formosartemisiae* (Takahashi) (Chakrabarti and Sarkar, 2001), *Capitophorus* sp. (Chakrabarti et al., 2002).
14. ***Anaphalis contorta* Hook. f.:** *Aphis fabae* Scopoli (Ghosh, 1986), *Aphis gossypii* Glover (Raychaudhuri et al., 1980), *Aphis spiraecola* Patch (Raychaudhuri, 1973; Ghosh, 1977),

- Brachycaudus helichrysi* (Kalt.) (Raychaudhuri, 1973), *Oedisiphum compositarum* van der Goot (Agarwala, 1979).
15. ***Anaphalis marginata* L.**: *Brachycaudus helichrysi* (Kalt.) (Ghosh et al., 1985).
16. ***Anaphalis nepalensis* (DC.) Aswal**: *Aphis frangulae* Kalt. (Chakrabarti and Sarkar, 2001), *Brachycaudus helichrysi* (Kalt.) (Chakrabarti and Sarkar, 2001), *Uroleucon budhium* (Basu et al.,) (Chakrabarti and Sarkar 2001).
17. ***Anaphalis subumbellata* C.B. Clarke**: *Oedisiphum soureni* Basu (Ghosh, 1969).
18. ***Anaphalis triplinervis* Benth. Ex Hance**: *Aphis gossypii* Glover (Raychaudhuri, 1973), *Brachycaudus helichrysi* (Kalt.) (Raychaudhuri, 1973; Ghosh, 1977), *Neomasonaphis anaphalidis* (Basu) (Basu, 1964), *Oedisiphum compositarum* van der Goot (Medda and Chakrabarti, 1998), *Oedisiphum soureni* Basu (Basu, 1964).
19. ***Anaphalis* sp.**: *Aphis fabae* complex (Raychaudhuri et al., 1980), *Aphis gossypii* Glover (Raychaudhuri, 1973; Raychaudhuri et al., 1980), *Brachycaudus helichrysi* (Kalt.) (Agarwala, 1979; Raychaudhuri et al., 1980; Chakrabarti et al., 2002), *Brachycaudus* sp. (Chakrabarti et al., 2002), *Capitophorus* sp. (Chakrabarti et al., 2002), *Neomasonaphis anaphalidis* (Basu) (Agarwala, 1979, Raychaudhuri, 1983), *Oedisiphum soureni* Basu (Medda and Chakrabarti, 1998), *Uroleucon erigeronense* (Thomas) (Chakrabarti and Sarkar, 2001), *Uroleucon budhium* (Basu et al.,) (Banerjee et al., 1969, Chakrabarti 1972).
20. ***Arctotis arctotoides* (L. f.) O. Hoffm.** (=*Venidium arctotoides* auct.): *Myzus persicae* (Sulzer) (Verma et al., 1975)
21. ***Arctotis grandiflora* Jacq.**: *Uroleucon jaceae* (Linn.) (Behura, 1963; Trehan and Halleppnawar, 1949).
22. ***Argyroxiphium* sp.**: *Macrosiphum* sp. (Ghosh, 1977).
23. ***Artemisia absinthium* Linn.**: *Macrosiphoniella pseudoartemisiae* Shinji (Verma and Mathur, 1966, Bhagat, 1984).
24. ***Artemisia caruifolia* Buch.-Ham. Ex Roxb.** : *Aphis kurosawai* Takahashi (Mondal et al., 1978), *Aphis spiraecola* Patch (Agarwala, 1979), *Macrosiphoniella spinipes* Basu (Agarwala, 1979), *Macrosiphoniella kikungshana* Takahashi (Agarwala, 1979), *Macrosiphoniella yomogifoliae* (Shinji) (Agarwala, 1979), *Tuberocephalus sasakii* (Matsumura) (Agarwala, 1979).
25. ***Artemisia dentate* Willd.**: *Capitophorus formosartemisiae* (Takahashi) (Behura, 1965; Raychaudhuri, 1973).
26. ***Artemisia nepalensis* Nees**: *Brachycaudus helichrysi* (Kalt.) (Raha, 1979), *Capitophorus formosartemisiae* (Takahashi) (Raha, 1979; 1981).
27. ***Artemisia nilagirica* (Clarke) Pamp.**: *Aphis kurosawai* Takahashi (Ghosh, 1990), *Aphis gossypii* Glover (Ghosh, 1990).
28. ***Artemisia roxburghiana* Bess.**: *Aphis kurosawai* Takahashi (Chakrabarti and Sarkar, 2001), *Capitophorus formosartemisiae* (Takahashi) (Maity and Chakrabarti, 1979).
29. ***Artemisia scoparia* Waldst. & Kit**: *Macrosiphoniella alatavica* (Nevsky) (Verma 1969), (Verma 1971), *Macrosiphoniella pseudoartemisiae* Shinji (Khuda-Bukhsh and Pal, 1986).
30. ***Artemisia vulgaris* L.**: *Aphis gossypii* Glover (Dharmadhikari and Ramaseshiah, 1970; Raychaudhuri et al., 1981), *Aphis kurosawai* Takahashi (Raychaudhuri, 1973; Ghosh, 1977; Mondal et al., 1978; Raha, 1979), *Aphis spiraecola* Patch (Raychaudhuri, 1973;

Agarwala, 1979), *Aphis* sp. (Rao, 1969), *Aulacorthum perillae* (Shinji) (Raychaudhuri, 1978), *Brachycaudus helichrysi* (Kalt.) (Raychaudhuri, 1973), *Capitophorus formosartemisiae* (Takahashi) (Agarwala, 1979; Raha, 1979; 1981), *Capitophorus* sp. (Rao, 1969; Chakrabarti et al., 2002), *Chaetosiphon gracilicorne* David et al., (Chakrabarti, 1972), *Chaitophorus clarus* Tseng & Tao (Chakrabarti, 1972; Chakrabarti and Raychaudhuri, 1975), *Coloradoa artemisiae* (del Guercio) (Basu et al., 1973; 1974), *Coloradoa artemisicola* Takahashi (Agarwala and Raychaudhuri, 1980), *Coloradoa rufomaculata* (Wilson) (Raychaudhuri, 1973; 1980), *Cryptosiphum aertemisiae* Buckton (Agarwala, 1979, Raha, 1979), *Dysaphis microsiphon* (Nevsky) (Chakrabarti and Sarkar, 2001), *Dysaphis hirsutissima* (Börner) (Rao, 1969), *Greenidea fericola* Takahashi (Raychaudhuri, 1973), *Macrosiphoniella spinipes* Basu (Raychaudhuri, 1978; 1980), *Macrosiphoniella formosartemisiae* Takahashi (Raychaudhuri, 1973; 1980), *Macrosiphoniella kalimpongensis* Basu & Raychaudhuri (Raychaudhuri, 1980), *Macrosiphoniella kikungshana* Takahashi (Maity and Chakrabarti, 1979, Raychaudhuri, 1973; 1980), *Macrosiphoniella pseudoartemisiae* Shinji (Chakrabarti, 1972; Basu et al., 1973; Basu and Raychaudhuri, 1976), *Macrosiphoniella sanborni* (Gillette) (Agarwala and Raychaudhuri, 1980), *Macrosiphoniella yomogifoliae* (Shinji) (Ghosh, 1977; Raychaudhuri, 1980), *Macrosiphoniella hikosanensis* Moritsu (Bindra and Shekhon, 1969), *Macrosiphoniella* sp. (Rao, 1969), *Myzus cerasi* (Fabricius) (Raychaudhuri, 1973; Basu et al., 1974), *Myzus dycei* Carver (Raychaudhuri, 1978), *Myzus ornatus* Laing (Raychaudhuri,

1973), *Myzus persicae* (Sulzer) (Ghosh and Agarwala, 1985), *Pleotrichophorus glandulosus* (Kalt.) (Chakrabarti, 1972; Chakrabarti et al., 1972), *Sappaphis piri* Matsumura (Raychaudhuri, 1978), *Schoutedenia* sp. (Rao, 1969), *Sitobion gravelii* (van der Goot) (Kar et al., 1990), *Toxoptera aurantii* (B. de Fonse.) (Agarwala, 1979), *Trichaitophorus aceris* Takahashi (Chakrabarti, 1977), *Tuberocephalus sasakii* (Matsumura) (Raychaudhuri, 1978; Agarwala, 1979), *Uroleucon* sp. (Rao 1969, Dharmadhikari and Ramaseshiah, 1970).

- 31. *Artemisia* sp.: *Aphis gossypii* Glover (Sengupta et al., 1962; Raychaudhuri et al., 1981), *Aphis kurosawai* Takahashi (Raychaudhuri, 1980), *Aphis raji* (Kumar & Burkhardt) (Chakrabarti and Sarkar, 2001), *Aphis spiraecola* Patch (Agarwala, 1979), *Aulacorthum dasi* Ghosh et al., (Raychaudhuri, 1973), *Aulacorthum* sp. (Raychaudhuri, 1973; 1980), *Brachycaudus helichrysi* (Kalt.) (Agarwala, 1979), *Brachycaudus* sp. (Chowdhuri et al., 1968; 1969), *Capitophorus* sp. (Chakrabarti et al., 2002), *Capitophorus formosartemisiae* (Takahashi) (Ghosh and Agarwala, 1980; Raychaudhuri, 1980), *Coloradoa indica* Verma (Verma, 1974), *Coloradoa rufomaculata* (Wilson) (Raychaudhuri, 1973; 1980), *Cryptomyzus taoi* Hille Ris Lambers (Raha and Raychaudhuri, 1981), *Cryptosiphum aertemisiae* Buckton (Raychaudhuri, 1973; 1980), *Dysaphis microsiphon* (Nevsky) (Chakrabarti and Medda, 1993), *Greenidea fericola* Takahashi (Raychaudhuri, 1973), *Hyalomyzus raoi* Hille Ris Lambers (Raychaudhuri 1980), *Longisiphoniella subterranea* Chakrabarti, Saha & Mandal (Chakrabarti et al., 1988), *Macrosiphoniella spinipes* Basu32,**

(Raha, 1979), (Basu and Raychaudhuri, 1976), *Macrosiphoniella alatavica* (Nevsky) (Rishi, 1975), *Macrosiphoniella himalayana* Saha & Chakrabarti (Saha and Chakrabarti, 1988), *Macrosiphoniella kalimpongensis* Basu & Raychaudhuri (Basu and Raychaudhuri 1976), *Macrosiphoniella kikungshana* Takahashi (Chakrabarti et al., 2002), *Macrosiphoniella pseudoartemisiae* Shinji (Maity and Chakrabarti, 1979, Raychaudhuri, 1980), *Macrosiphoniella sanborni* (Gillette) (Basu and Raychaudhuri, 1976, Raychaudhuri, 1980), *Macrosiphoniella sikkimartemisiae* Agarwala & Raychaudhuri (Agarwala, 1979), *Macrosiphoniella yomogifoliae* (Shinji) (Raychaudhuri, 1980; Agarwala and Raychaudhuri, 1980), *Macrosiphoniella grandicauda* Takahashi & Moritsu (Basu and Raychaudhuri, 1976), *Macrosiphoniella oblonga* (Mordvilko) (Agarwala, 1979), *Macrosiphoniella paraoblonga* Basu & Raychaudhuri (Basu and Raychaudhuri, 1976), *Macrosiphoniella hikosanensis* Moritsu (Chakrabarti and Sarkar, 2001), *Macrosiphoniella* sp. (Chakrabarti et al., 2002), *Myzakkaia verbasci* (Chawdhuri et al.) (Raychaudhuri 1973; 1980), *Myzus cerasi* (Fabricius) (Raychaudhuri, 1973), *Myzus kalimpongensis* (Ghosh et al.) (Raychaudhuri, 1980, Raha and Raychaudhuri, 1981), *Myzus siegesbeckicola* Strand (Raychaudhuri et al., 1981), *Myzus persicae* (Sulzer) (Agarwala, 1979), *Neomasonaphis anaphalisidis* (Basu) (Raychaudhuri, 1973; 1980), *Paraphorodon cannabis* (Passerini) (Behura, 1963), *Pleotrichophorus glandulosus* (Kalt.) (Raychaudhuri, 1973; 1980), *Protrama longitarsus sclerodensus* Kumar (Ghosh, 1982), *Sappaphis piri* Matsumura (Sharma and Bhalla, 1964;

Kumar, 1973), *Sitobion gravelii* (van der Goot) (Agarwala, 1979), *Toxoptera aurantii* (B. de Fonsc.) (Agarwala, 1979), *Tuberocephalus sasaki* (Matsumura) (Raychaudhuri, 1973, 1980), *Uroleucon pseudotanaceti* (Verma) (Raychaudhuri, 1973; Agarwala, 1979), *Uroleucon sonchi* (Linn.) (Raychaudhuri, 1973), *Uroleucon* sp. (Ghosh and Agarwala, 1985).

32. ***Aster amellus* L.: *Aphis spiraecola*** Patch (Joshi and Poorani, 2007)
33. ***Aster trinervius* Roxb. ex D.Don:** *Aphis gossypii* Glover (Verma et al., 1975), *Myzus persicae* (Sulzer) (Verma et al., 1975).
34. ***Aster* sp.: *Aphis gossypii*** Glover (Raychaudhuri, 1978), *Myzus ornatus* Laing (Raychaudhuri et al., 1981), *Myzus siegesbeckicola* Strand (Raychaudhuri et al., 1981), *Toxoptera aurantii* (B. de Fonsc.) (Raychaudhuri et al., 1981).
35. ***Astragalus nuttallii* (Torr. & Gray) Howell (=*Erigeron asteroides* Roxb.): *Aphis craccivora* Koch** (David, 1956a).
36. ***Bidens bipinnata* L. (= *Bidens wallichii* DC.): *Aphis gossypii*** Glover (Ghosh, 1977), *Brachycaudus helichrysi* (Kalt.) (Chakrabarti and Sarkar, 2001), *Aphis fabae* Scopoli (Ghosh, 1986), *Aphis spiraecola* Patch (Dharmadhikari and Ramaseshiah, 1970; Ghosh, 1977), *Macrosiphoniella yomogifoliae* (Shinji) (Chakrabarti, 1972; Ghosh, 1977), *Toxoptera aurantii* (B. de Fonsc.) (Chakrabarti and Sarkar, 2001).
37. ***Bidens biternata* (Lour.) Merr. & Sherff: *Aphis craccivora* Koch** (Ghosh, 1990), *Aphis spiraecola* Patch (Ghosh and Agarwala, 1985), *Myzus ornatus* Laing (Rao, 1969).
38. ***Bidens pilosa* L.: *Aphis craccivora*** Koch (Agarwala, 1979), *Aphis fabae* complex (Raha, 1979), *Aphis gossypii*

- Glover (Ghosh and Agarwala, 1980, Raychaudhuri *et al.*, 1981), *Aphis spiraecola* Patch (Chakrabarti and Raychaudhuri, 1975; Agarwala and Raychaudhuri, 1980), *Brachycaudus helichrysi* (Kalt.) (Raha, 1979), *Myzus ornatus* Laing (Raychaudhuri, 1973), *Myzus persicae* (Sulzer) (Sengupta *et al.*, 1962; Maity and Chakrabarti, 1979), *Rhopalosiphum padi* (Linn.) The literature survey established that at least 199 Indian species of aphids feed upon almost 208 plant species belonging to the family Asteraceae or Compositae. Among the aphid species, *Aphis gossypii* Glover was recorded feeding 77 food plants followed by *Brachycaudus helichrysi* (Kalt.) (72 species), *Aphis spiraecola* Patch (70 species), *Myzus persicae* (Sulzer) (45 species), *Myzus ornatus* Laing (35 species), *Aphis fabae* Scopoli (25 species), and *Aphis craccivora* Koch (23

species). Most suffered plants belong to the genera *Artemisia* (60 aphid species) and *Sonchus* (25 aphid species).
